

## Agenda

1. Welcome and Introductions
2. Examination of Matter 10 – Waste and Environmental Standards

Focus for Discussion:

***Is the evidence base in support of the Core Strategy's approach to waste robust? Are the Core Strategy's measures for tackling climate change adequately supported by the evidence base, consistent with national policy in PPS 1's Climate Change Supplement and effective?***

- i. To what extent is the Core Strategy and SP13 in general conformity with both the London Plan and its draft replacement?
- ii. To what extent is CDB12 Joint Waste Apportionment Technical Paper agreed with the GoL and the Mayor of London and to what extent does it satisfy the aims of PPS10 and its companion guide? Are the figures cited consistent in lieu of rep 560 and 679?
- iii. What evidence underpins SP 13? Is the evidence base to SP 13 robust and credible?
- iv. To what extent will the Development Management DPD safeguard sites to manage Southwark's waste? Will such sites be safeguarded adequately in the interim?
- v. How is hazardous waste to be managed?
- vi. Should waste targets incorporate a preference for waste reduction and recycling over incineration (feasibility of clear targets in this area?)?
- vii. Is the Thames Tunnel referenced adequately (in supportive terms) within the CS? Should it be included as a target and Strategic Objective of the CS?
- viii. Will surface and ground water quality be protected adequately by the proposed changes?
- ix. Are the energy targets in SP13 actually fixed requirements? Is the policy sufficiently flexible in such terms? Should the targets be subject to tests of viability and suitability? Have alternatives been considered fully?
- x. Is SP 13 (energy) in accord with PPS1 and the Climate Change Supplement? In line with PPS22 para 8?
- xi. Does SP 13 replicate unnecessarily Building Regulations and its intended changes?
- xii. Does SP 13 address adequately development that affects existing buildings? Eg retrofitting?
- xiii. Do the CS and SP 13 address adequately the issue of air pollution, especially in the north of the Borough?
- xiv. Does the policy imply that all development should address existing pollution/amenity problems and is this sound?

## 3. Other Matters

## 4. Close
