

FURTHER GUIDANCE ON LIGHTING ASSESSMENTS

Provide details of external lighting proposals including:

- Layout plan with beam orientation
- Schedule of the equipment in the design
- Hours of operation
- Light levels and spillage
- The size of the lights/light fittings
- For projecting signs mark the distance from the edge of the sign to the kerb edge

Include evidence demonstrating that consideration has been given to the effect of light from the proposed development on biodiversity when the development is on or adjacent to a Site of Importance for Nature Conservation.
