

## Appendix 1: Supporting Datasets

The data below sets out the need in the borough and the number of people with these protected characteristics. It provides evidence for who is impacted by the policies in the New Southwark Plan. These are taken from the JSNA data held by public health and a range of other sources national and regional sources of data, as well as the Integrated Impact Assessment baseline data and indicators.

The table identifies where do have data, and the places we would want to have more specific equalities data, but either the data is unavailable and difficult to locate or it is unobtainable due to the nature of the protected characteristic and process of obtaining that data.

This table will be updated alongside the Integrated Impact Assessment IIA to reflect the changing need and context in the borough.

The data and indicators that support each policy are set out in the Integrated Impact Assessment Appendix 9 Baseline Indicators, these are referred to in the Full Equalities Impact Assessment.

Dataset										
Strategic Policy	Age	Disability	Sex	Gender Reassignment	Marriage and Civil Partnership	Race and ethnicity	Religion and belief	Pregnancy and maternity	Socio-economic disadvantage	Sexual Orientation
SP1: Quality Affordable Housing  See IIA Appendix 3 - baseline data section on Housing for further information.	The council has support available for homecare for the elderly and independent living and residential care.  In 2018, 17.31% of the population in Southwark were over 60. In the same year, 22.56% of the population were 19 and under <sup>1</sup>	There is a waiting list for Wheelchair homes and adaptable rooms in Southwark <sup>2</sup> .  Southwark Council's wheelchair housing policy is informed by the 2015 Housing Standards <sup>3</sup> .	Not available	Not available	Not available	Under the Equality Act 2010, outside of the PPTS planning definition, we recognise Gypsy and Travellers as an ethnicity. We have acknowledged this in our EQIA.  Based on this consideration within Draft	Not available	Family homelessness in Southwark is high and getting worse with a count of 3.1 per 1000 in 2017/18 <sup>4</sup> . This demonstrates a need to provide homes for families.  Local data suggests that obesity in pregnancy varies considerably in different ethnic	Southwark Council has committed to delivering 11,000 new homes by 2043 <sup>7</sup> .  The average house price in Southwark was £476,597 in 2019 <sup>8</sup> .  Southwark residents have the spend around 15.19 times annual earnings on purchasing a home <sup>9</sup>	Not available

## COVID-19 Update to EQIA

In this time of uncertainty, LB Southwark understands that those with protected characteristics are in some cases, more vulnerable to the impacts of COVID-19.

COVID-19 will have significant medium and long term health, social and economic impacts on our communities, with some population groups being affected disproportionately. Emerging concerns for health include the impact of COVID-19 on people living with chronic and long-term health conditions (e.g. diabetes and respiratory conditions) who may be at increased risk of complications from COVID-19 and increased risk of death. COVID-19 may also exacerbate social isolation, loneliness, and mental illness. An economic downturn as a result of COVID-19 may have long term impacts on health and wellbeing. Housing is a significant social determinant of health and poor housing adds to the hardship of the COVID-19 crisis. The pandemic has highlighted inequalities in housing and the consequences for health. Those living in overcrowded or multi-generational homes may be at greater risk of contracting and falling ill from COVID-19. Increased time spent at home, and a lack of access to outdoor space (particularly for those in the private rented sector), may exacerbate health impacts. There is an increased risk of people becoming homeless or falling into debt due to an inability to pay rent. In addition, the pandemic has highlighted the importance of suitable housing and the need to consider availability and provision of social rented and intermediate housing.

Given that the intelligence and evidence regarding COVID-19 are evolving rapidly, both the Equalities Impact Assessment (EQIA) and Health Impact Assessment (HIA) will continue to be reviewed and updated at each stage of the plan. Further information on the impact of COVID-19 will be added as it becomes available. In addition, the impact of COVID-19 will also be considered and assessed in the Statement of Community Involvement to take into account the impact of COVID-19 on the potentially changing priorities in the borough in terms of how we consult, plan, and make decisions in the planning process.

There is no data on the extent of this yet, as the situation is emerging, but the Planning Policy Team will work alongside Public Health to understand the impact of COVID-19 on residents, and how this may alter our implementation of the policies in the NSP and alter need in the borough.

We will consider the impact of what has happened with regard to COVID-19 and take particular regard to the below –

1. Monitoring of housing – provision of social rent and intermediate housing
2. New homes delivery – council commitment to deliver 11,000 new council homes by 2043
3. Set up a town centre working group to prepare a paper for members to consider changes
4. Improvements to digital
  - a. Upgrade online services to ensure information and services is accessible and easy to use
5. Work alongside the Housing team at LB Southwark
6. Town centres
  - a. Monitor impact of relaxation of permitted development rights allowing a change of use from A3 or A4 use class to A5

- b. Use and change of High Streets
  - c. Use and change of Offices
7. Streetscape Design Manual - <https://www.southwark.gov.uk/transport-and-roads/traffic-orders-licensing-strategies-and-regulation/southwark-streetscape-design-manual-ssdm>
  8. Economic development – we have the Economic Wellbeing Strategy - <https://www.southwark.gov.uk/assets/attach/2933/Economic-Wellbeing-Strategy-2017-2022.pdf>
  9. Public Health are considering COVID in all our work areas and there are strategies being produced in which impact of COVID is likely to feature prominently – current relevant health policy that will be considered is listed below:
    - a. **Southwark Joint Health and Wellbeing Strategy 2015 - 2020** - sets out our partnership vision to improve health and reduce health inequalities in the borough. <https://www.southwark.gov.uk/health-and-wellbeing/public-health/for-professionals?chapter=3#:~:text=The%20Joint%20Health%20and%20Wellbeing,policies%20and%20actions%20in%20Southwark.&text=helping%20people%20with%20existing%20long,conditions%20including%20self%20management%20%26%20support>
    - b. **2019 Annual Public Health Report** - forms part of the Joint Strategic Needs Assessment (JSNA) process in Southwark and provides decision makers with priorities and recommendations for local action. <https://www.southwark.gov.uk/assets/attach/12097/APHR-2019-Our-Climax-Our-Health.pdf>
    - c. Southwark Air Quality Improvement Strategy and Action Plan 2018-2023 (upcoming)
    - d. **Southwark Air Quality Improvement Strategy and Action Plan 2012-2017** <https://www.southwark.gov.uk/assets/attach/4407/Air-Quality-Strategy-Action-Plan-Final-Version.pdf>
    - e. **Our PH Strategies** <https://www.southwark.gov.uk/health-and-wellbeing/public-health/for-professionals?chapter=4>  
At this webpage: Alcohol action plan 2017-20; Food security action plan (Fairer Food Southwark Plan); Healthy weight strategy; Suicide prevention strategy and action plan; Tobacco control strategy; and Immunisation strategy and action plan.
    - f. **Southwark's Outbreak Prevention and Control Plan (OPCP)**  
Southwark's Outbreak Prevention and Control Plan (OPCP) sets out Southwark Council's ambition and approach to providing local leadership and support for the pandemic response. Led by Public Health, but working closely with many council, health service, and voluntary sector partners, this document outlines the borough's operational approaches to the challenge of coronavirus. **Includes a strong community engagement element-**  
<https://www.southwark.gov.uk/assets/attach/12902/Southwark-s-Outbreak-Prevention-and-Control-Plan-30-June-2020-.pdf>

It is too early to understand the full extent of the impact of COVID-19. The impacts of COVID-19 are something we will continue to monitor and assess the impacts working with Regeneration and Public Health.
