

Area Action Plans Review

Note for the NSP Inspectors

24 April 2021

www.southwark.gov.uk

Background

1. The National Planning Policy Framework (NPPF) 2019 paragraph 33 says that policies in local plans (Southwark Plans, Area Action Plans (AAPs)) should be reviewed to assess whether they need updating at least once every five years and then as necessary.
2. The NPPF paragraph 31 says that the preparation and review of policies should be underpinned by relevant and up to date evidence. They should be informed by sustainability appraisal and should demonstrate how the plan has met sustainability objectives with a review of options, impacts and compensatory measures.
3. Generally Area Action Plans are now all being replaced by the changes to the planning system as set out in the NPPF.
4. There also needs to be a review because the Inspectors have requested this information to be provided for them to examine. This report will be provided for the Planning Inspector as part of the hearings at the Examination in Public (EIP).
5. A clear consideration of rescinding the 3 adopted Area Action Plans as part of the process of updating Southwark Council's Development Plan will be presented to Cabinet and Council Assembly alongside updating the NSP. The AAPs are: Aylesbury AAP (AAAP) 2010, Canada Water AAP (CWAAP) 2012/updated 2015 and Peckham and Nunhead AAP (PNAAP) 2014. Until the NSP is adopted these Plans will remain adopted with full weight. Decisions on rescinding will not be made until this time.
6. The Final NSP will contain an appendix setting out the policy that the NSP is replacing.

Preparing the NSP

7. Reviews took place of all of the visions in the AAPs and they have been replaced in the NSP, consulted on and they are going through examination.

These will be adopted in 2021 as part of the NSP. The AAP visions would then be removed as they have been replaced.

8. Reviews of all of the policies in the AAPs took place and they have been replaced in the NSP with more up to date policies. Consultation has taken place on these policies and they are going through examination. In the Aylesbury AAP there were 2 policies in the AAP which provided higher standards. These were the family homes and the space standards. Therefore the Council has proposed modifications to the submission version of the NSP to increase the room sizes and space standards to the same level as the AAP. There is also a modification to reduce the parking standards requested by TfL to enable general conformity with the London Plan. These are being proposed as main modifications in an updated report presented as part of the NSP EIP hearing EIP 202. These will be adopted in 2021.
9. Reviews of all of the sites in the AAPs took place, the Council set out the current status of each site in the AAPs to decide which sites should be taken forward in the NSP. The Council removed all of the sites that are being built or that were completed from the list to take forward to the NSP. All of the other sites that were in the AAPs have been included in the NSP. The Council then consulted on these sites and they are being examined. The exception is the detail on the core area for the Aylesbury AAP, the proposed main modification is set out in EIP 202. These will be adopted in 2021.
10. The monitoring table has been provided to the hearings for the NSP. Where relevant, monitoring indicators from the AAPs have been carried forward into the NSP monitoring framework. These will be regularly updated online. These will be adopted in 2021.
11. The reviews are provided as Appendix A to this report. The NSP has been updated to remove all references to the AAPs through minor modifications. This ensures that the NSP does not rely on other plans for soundness. All of the changes to plans are retaining the current protections or making improvements. All of the changes are in line with the AAP policy commitments.

DM process/risk

12. The DM process currently requires additional narrative to explain how the policies have changed and been updated. Each report within the AAP areas has to reference NSP and AAP policies and explain where there are differences. Therefore the rescinding will make the process of preparing DM reports more effective and the planning issues can be explained using the most up to date policies.

13. The modifications to P2 and P14 to amend the family housing to include the larger units as set out in the Aylesbury AAP and the space standards to collate the unit sizes in the London Plan, NSP and Aylesbury AAP by choosing the higher standard for each type of property are necessary for soundness. This is required for clarity and effective delivery. The Aylesbury AAP is now very old and the evidence base is not up to date and therefore there could be a challenge to the delivery of these higher standards if the NSP standards are adopted for the Aylesbury area. It is also unclear if there are different space standards set out in different documents.
14. There is outline consent for NSP78 masterplan so CWAAP can be withdrawn. The NSP78 decision has established the key scheme principles and other sites can be assessed against the NSP site allocations and general development management policies.
15. There is an outline consent for the Aylesbury masterplan which covers the Action Plan core area so the AAAP can be withdrawn. The decision has established key scheme principles and the detail can be assessed against the general development management policies.
