SINC Review & Thorough Ecology Survey / Report for London Borough of Southwark
Appendix 3: Boundary changes
Corrections:

Please note a number of errors and corrections provided for a number of completed maps and GIS data. These are as follows:

- Southwark Park and the Old Nursery Site: There is no gap between the two sites. The small inlet should also be part of Southwark Park;
- Dog Kennel Hill Wood: The small area to the southeast is not part of this SINC site but relates to an existing “other Open Space” OS120 St Francis Park.
- In case colour printing is not possible – refer to Table 11, which clarifies the areas to be excluded or included.
- OS7 - Carlton Place Copse is the wrong name for this site and should be called Surrey Docks Sports Ground. The area shown is to be excluded, whilst the area mapped as woodland and grassland (see habitat map) is to be included with Russia Dock Woodlands SINC located adjacent and contiguous with this site;
- Lettsom Gardens – No boundary changes are being proposed. The driveway leading to Lettsom Gardens is to be included in the adjacent proposed borough site named Grove Park Allotments. The area to the northwest (shown to be included) is already included and a GIS error.
- St Francis’ Park – A proposed SINC that did not meet the SINC criteria. The “other open space” boundary of the park is poorly mapped along three boundaries and needs amending.
- Greenland Dock – This area is to be included within this adjacent SINC – and connected via a canal under Finland Street.
- New proposed extension to Faraday Gardens, which includes a recently created wildlife pond and herbaceous / shrubs contiguous with the park.
- Cox’s walk allotments – A proposed SINC that did not meet the SINC criteria. A slither of land exists between the adjacent housing estate boundary wall and the allotment fence. Area is not managed. Proposed inclusion with the allotment.
- Grove Park allotments: -This map is not correct. This area is part of the allotment already.
